## (54) SEALING MEMBER AND VALVE USING IT

## (57)Abstract:

PROBLEM TO BE SOLVED: To provide a sealing member for obtaining a stable seal effect even in a very low temperature and high temperature areas and causing no buckling even under a high pressure.

SOLUTION: This sealing member 11 forms an opening 11a over the whole periphery, and has an elastically deformable tubular body part 11b and a base part 11c integrally formed with the body part 11b so as to mutually expand outside from both edge parts of the opening part 11a, and comprises a metallic member.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the  
examiner's decision of rejection or application  
converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of  
rejection]

[Date of requesting appeal against examiner's decision  
of rejection]

[Date of extinction of right]
